

CORPORATE OVERVIEW

For over 40 years, Skyservice has been one of North America's most trusted names in business aviation — built on an unwavering commitment to safety, service, and operational excellence.

Our fully integrated platform spans fixed-base operations, aircraft management, charter, maintenance, and aircraft sales and acquisitions — serving corporate and private clients across 14 FBO locations in Canada and the United States, four Canadian MRO facilities, and a managed fleet of more than 65 aircraft. We deliver seamless end-to-end aviation solutions that move people and organizations forward.

Safety is the foundation of everything we do. Our Canadian operations hold ARGUS Platinum status and IS-BAO Stage III certification — the highest standards for operational safety and best practices in business aviation — while our U.S. locations hold ARGUS Gold. Our aircraft sales and acquisitions team carries IADA accreditation, reflecting the same standard of integrity and professionalism we bring to every client relationship. Across the industry's most respected FBO surveys, including Aviation International News, Wings Magazine and ProPilot, Skyservice locations consistently rank among the best in Canada and the Americas.
