SOLUTIONS THAT ADDRESS THE AIRCRAFT LIFE CYCLE

INTEGRATED AVIATION SERVICES, DELIVERED WITH INTENT

Skyservice™ operates an integrated aviation services platform built to support the full complexity of business aircraft ownership and operation. With more than four decades of experience serving the North American market, we deliver disciplined execution, seasoned operational judgment, and accountability across every service we provide.

Our capabilities span aircraft charter, sales and acquisition, aircraft management, fixed-base operations, maintenance, detailing, and aircraft end-of-life services. Each is delivered to the same exacting standard, informed by deep operational insight and executed within a single, unified organization.

Skyservice supports a wide range of client relationships. For some, we serve as a long-term operating partner, managing the complexity of ownership from acquisition through daily operations and eventual transition. For others, our expertise is engaged at critical moments — when precision, experience, and reliability matter most.

AIRCRAFT CHARTER

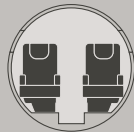

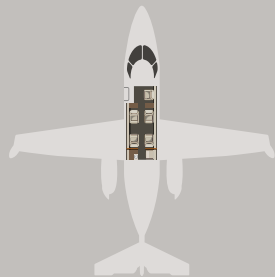

At Skyservice, charter is delivered with the same operational discipline that defines our broader aviation platform. Every decision is shaped around your schedule and priorities — without compromise.

From identifying the most suitable aircraft to managing complex itineraries, our teams coordinate each journey with precision. In-flight catering, ground transportation, customs coordination, and trip logistics are handled seamlessly, allowing you to remain focused on what matters most.

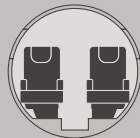

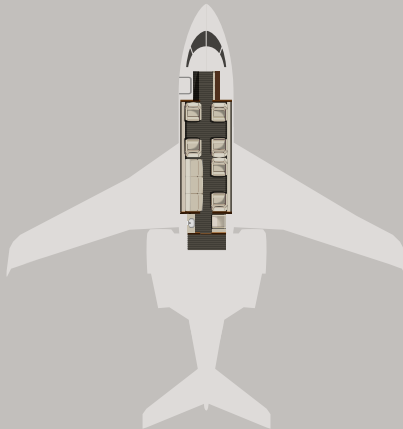

Charter travel offers clear advantages: greater flexibility, direct access to destinations beyond scheduled airline routes, and the ability to avoid time-consuming connections. With controlled departure windows, streamlined customs clearance, and around-the-clock access to experienced aviation professionals, Skyservice delivers a charter experience built on reliability and discretion.

Every charter decision is
made to protect your time,
focus, and priorities.**

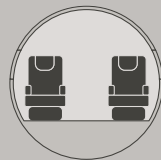

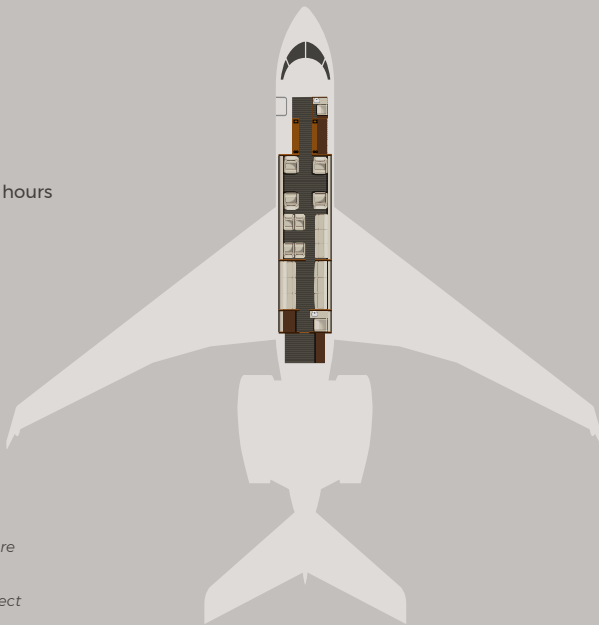

SMALL-SIZE CABIN
Flight Duration: 3–5 hours
Seats: 4–5 passengers
Max Height: 4' 11"

MID-SIZE CABIN
Flight Duration: Up to 6 hours
Seats: 6–8 passengers
Max Height: 5' 9"

LARGE-SIZE CABIN
Flight Duration: Up to 10 hours
Seats: 12–18 passengers
Max Height: 6' 3"

Illustrations and cabin sizes are for illustrative purposes only. Skyservice charter personnel can help you identify the perfect aircraft for your trip.

AIRCRAFT CHARTER

ACCESS TO A BROAD AIRCRAFT FLEET

With Skyservice's extensive fleet of corporate aircraft, we match each charter flight to your mission requirements. Whether your priority is cabin configuration, range, or operational flexibility, our teams identify the appropriate aircraft and coordinate every detail to ensure a smooth, efficient journey.

BOARDROOM IN THE SKY

Travel in cabins designed for focus, privacy, and comfort. From conducting meetings to preparing for arrival or simply disengaging from the pace on the ground, each environment supports productivity without interruption.

OUR FBO FACILITIES

Purpose-built for seamless charter travel, Skyservice's FBOs combine thoughtful hospitality with disciplined ground coordination. Passengers benefit from private lounge environments, concierge support, and functional spaces to transition comfortably on arrival, while crews and aircraft are supported through efficient handling and on-site services.

IMAGINE THE ADVANTAGES

- **Bypass crowded security, customs, and immigration queues**
- **Fly on schedules built around your priorities**
- **Select in-flight catering tailored to your preferences**
- **Experience discreet, personalized service throughout your journey**

AIRCRAFT SALES & ACQUISITION

Buying or selling a private aircraft is a complex, highly individualized transaction. Success depends on expert guidance, deep market insight, and a thorough understanding of aircraft performance, maintenance, and ownership considerations.

With 40 years of aviation experience, Skyservice brings deep expertise across all major aircraft manufacturers and hundreds of aircraft types. As operators and maintainers, not just brokers, we understand these aircraft in real-world operating conditions, from acquisition through long-term ownership.

For buyers, our advisors guide clients through needs assessment, aircraft sourcing, market evaluation, negotiation, and purchase execution. Following acquisition, clients can transition seamlessly into Skyservice's aircraft management and operational services.

For sellers, we advise on preparing your aircraft for sale, positioning it effectively, and maximizing its value in the global marketplace. As an accredited IADA broker, Skyservice provides access to a worldwide network of qualified buyers.

First-hand expertise informs a consultative sales process designed around your goals and long-term ownership objectives.

OWNERSHIP
MADE
EFFORTLESS

AIRCRAFT MANAGEMENT

Skyservice delivers a comprehensive aircraft management solution built around disciplined operations, thoughtful oversight, and long-term asset stewardship. Our approach brings structure, consistency, and experienced judgment to every aspect of aircraft ownership — simplifying complexity while preserving owner control and privacy.

Each managed aircraft is supported by an account manager who coordinates teams across flight operations, crew management, maintenance planning, safety, and financial administration. This integrated model ensures decisions are informed by real operational insight and executed with accountability at every stage of ownership.

Aircraft utilization is structured around owner preferences. For those who choose to participate in charter operations, Skyservice manages charter activity selectively and responsibly — aligning revenue opportunities with safety standards, operational limits, and owner priorities. For owners who prefer private use only, the same disciplined management framework applies, without compromise.

Skyservice manages a diverse fleet of business aircraft with an uncompromising focus on safety, security, and client privacy.

AIRCRAFT MANAGEMENT

ACCOUNT MANAGER

For managed aircraft, your account manager serves as the central point of coordination, ensuring clarity, continuity, and informed decision-making. Supported by integrated Skyservice teams, they oversee operations, maintenance planning, crew coordination, and financial administration – so nothing is fragmented and nothing is left unmanaged.

PRIORITY MAINTENANCE SCHEDULING

A proactive approach to maintenance protects aircraft airworthiness and maximizes aircraft availability. Managed aircraft receive priority scheduling, including access to maintenance blocks at Skyservice-certified facilities, reducing downtime and minimizing operational disruption.

YOUR BENEFITS

- Priority maintenance scheduling
- Optional participation in charter programs to offset ownership costs
- Access to charter aircraft when your aircraft is undergoing maintenance
- Flexible pilot and crew employment options
- Discounted fuel programs
- Oversight of required training, certifications, and international operational standards
- Access to amenity-rich private jet centres, including hangar and ground services

EXPERIENCE
A BETTER
WAY TO FLY

Napa, California FBO

FIXED-BASE OPERATIONS

Skyservice's award-winning private jet centres, also known as fixed-base operations (FBOs), provide a consistent, controlled arrival and departure experience across our growing network. Strategically located in key aviation markets, our FBOs offer the advantage of uniform service standards, familiar processes, and dependable execution — wherever you fly.

Passengers benefit from private, well-appointed lounge environments, concierge support, and access to functional spaces such as offices and boardrooms, along with light refreshments and connectivity designed to support efficient travel. Flight crews are supported through dedicated crew facilities, including rest areas, showers, and ground transportation services.

Ramp access, hangar availability, and on-site aircraft services, including detailing and select maintenance support, enable efficient ground handling and aircraft readiness. Designed to be convenient, secure, and discreet, Skyservice FBOs support smooth operations while reinforcing a single standard of service across every location.

Trust Skyservice for consistent delivery of world-class service, the utmost in convenience and exemplary safety measures.

SAFEGUARD YOUR AIRCRAFT

AIRCRAFT MAINTENANCE

Operating 24/7 from state-of-the-art facilities, Skyservice's highly skilled maintenance experts and engineers deliver an extensive range of maintenance, repair, and overhaul (MRO) services at our Canadian locations, supported by maintenance and repair capabilities at select U.S. facilities.

Our comprehensive service offering includes complete avionics support at multiple locations, structural repairs, and highly specialized non-destructive testing (NDT). We also hold a wide range of Supplemental Type Certificates (STCs), authorizing us to modify and enhance approved aircraft systems and components. Whether your aircraft requires scheduled maintenance or urgent AOG support, Skyservice delivers responsive, dependable solutions.

Qualified to perform maintenance on hundreds of private, business and commercial aircraft types, Skyservice is approved as an aircraft maintenance organization by leading oversight agencies, including:

- Transport Canada
- U.S. Federal Aviation Administration
- Bermuda Department of Civil Aviation
- Hong Kong Civil Aviation Department
- Civil Aviation Authority of Singapore
- European Aviation Safety Agency

Our OEM partnerships reflect the depth of our technical expertise and the consistently high quality of our maintenance and repair work, while also enabling competitive pricing for clients who select ongoing MRO services. Whether supporting a one-time repair or ongoing maintenance requirements, our teams deliver disciplined execution and reliable outcomes.

Beyond MRO, Skyservice supports operators through a global parts and supplies operation delivering specialty components worldwide. For owners seeking to modernize or refresh their aircraft, our refurbishment capabilities are recognized for custom interior craftsmanship, cockpit upgrades, and exterior paint enhancements. At end-of-life, we also provide aircraft teardown and recycling services to help owners responsibly reclaim asset value.

OUR AIRCRAFT MAINTENANCE SERVICES INCLUDE, BUT ARE NOT LIMITED TO:

- Scheduled Maintenance
- Aircraft on Ground Services (AOG)
- Avionics & Upgrades
- Non-Destructive Testing (NDT)
- Parts & Supplies
- Pre-Purchase Inspections (PPI)
- Supplemental Type Certificates
- Certifications & Approvals
- Aircraft Recycling

SAFETY AND SERVICE YOU CAN TRUST

SAFETY & SECURITY

Skyservice operates one of the most comprehensive safety systems in the industry. Our Safety Management System (SMS) proactively identifies hazards, conducts rigorous risk assessments, and drives continuous improvement across every phase of our operations — including flight operations, maintenance activities, FBO services, and security.

This disciplined approach is embedded in our culture. Safety guides how we plan, decide, and operate. Our teams are trained to anticipate risk, apply proven protocols, and deliver service with precision and accountability.

With an excellent safety record and maintenance expertise trusted worldwide, Skyservice delivers a consistent, world-class standard of safety and reliability. As your aviation partner, we remain committed to mastery in everything we do — today and for the journeys ahead.

**From planning to execution,
safety and security are
built into every step of your
journey with Skyservice.**
