

Aircraft Management

One Standard. Every Stage of Ownership.

BUILT FOR LONG-TERM AIRCRAFT OWNERSHIP

Skyservice's approach to aircraft ownership is shaped by experience — and by listening carefully to what owners require over time.

For more than 40 years, that perspective has guided how we've grown, deliberately adding capabilities that bring the full lifecycle of an aircraft under one accountable, integrated structure.

What sets Skyservice apart is not a single capability, but the depth and alignment across them. We operate maintenance, FBOs, charter, aircraft management, and aircraft sales within a single platform. As a result, we view each aircraft not as a transaction, but as a long-term asset.

Decisions made in one area are informed by direct operational, technical, and commercial insight from the others, creating continuity and foresight that standalone providers simply cannot match. That integrated perspective is why clients trust Skyservice with their aircraft year after year — and why many stay with us for decades.

*End-to-end aircraft oversight,
delivered through one
integrated organization*

WE MANAGE AIRCRAFT THE WAY
SERIOUS OWNERS THINK ABOUT THEM:
AS STRATEGIC ASSETS.

WHERE EXPERIENCE TRANSLATES INTO CONFIDENCE

Aviation is our craft. Our people are our strength. Exceptional service starts with professionals who bring judgment, continuity, and care to every decision that impacts an aircraft.

Our flight crews average more than 8,000 flight hours, supported by maintenance specialists with deep OEM expertise and dedicated client service professionals who understand your aircraft, your operation, and your priorities.

That continuity matters. When teams stay, owners benefit from:

- Consistency and continuity: stable teams, fewer handoffs, clearer communication, and reduced operational risk
- Mastery and expertise: deep understanding of your aircraft's history, configuration, and operating patterns
- Partnership and guidance: trusted relationships built through experience, not transactions

This is mastery delivered by people who know your aircraft – and stand behind it every day.

Dedicated teams aligned around each aircraft, every operation, and one elevated standard

skyservice

TRUSTED BY OWNERS AND OPERATORS.
RESPECTED BY CREWS.
PROVEN IN DAILY OPERATION.

A TRUSTED HOME BASE,
WHEREVER YOU FLY

OPERATIONAL CONSISTENCY, NETWORK-WIDE

Every arrival and departure should feel consistent, controlled, and elevated.

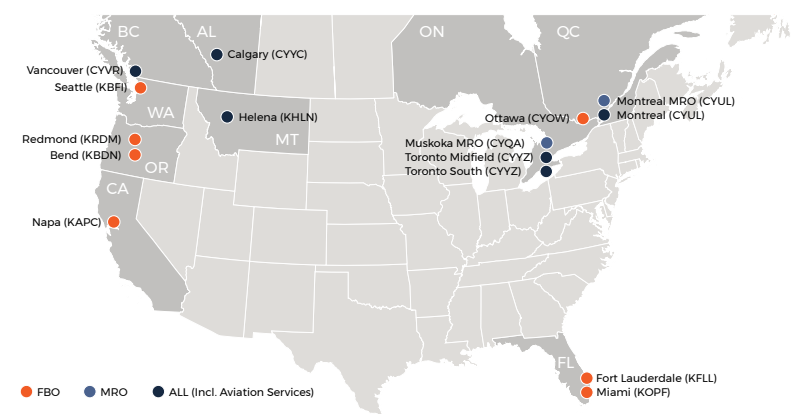

That expectation guides how we operate our FBO network across Canada and the United States, including Fontainebleau Aviation-branded properties in South Florida.

Because these facilities operate within the Skyservice platform, standards for service, safety, and operations remain consistent. Each FBO is a welcoming, functional environment between flights – supporting crews, passengers, and operations.

Owners benefit from:

- A consistent experience at every Skyservice FBO
- Direct coordination between concierge, ground handling, maintenance, and flight operations
- Preferred fuel pricing and hangar access

Our FBO network is a unified aviation ecosystem – designed to support operations and ensure every movement is executed with precision.

Napa, California FBO

SCALE-DRIVEN EFFICIENCY WITHOUT COMPROMISE

Operating efficiently is not about cutting corners — it's about applying disciplined systems at scale.

Through the breadth of our managed fleet and long-standing industry relationships, Skyservice delivers meaningful cost advantages for owners and operators, while maintaining uncompromising standards for safety, training, and aircraft care.

These advantages include:

- Reduced insurance premiums supported by fleet scale and proven safety performance
- Fuel procurement efficiencies across our FBO network
- Standardized, high-quality training programs that improve crew consistency and reduce recurrent costs
- Preferred pricing on connectivity, navigation, and subscription services

These benefits are delivered through dedicated account managers and flight coordination teams who actively manage cost, readiness, and utilization on your behalf.

The result is a more efficient operation — one that protects capital, reduces friction, and keeps aircraft mission-ready without compromising standards.

MEANINGFUL SAVINGS —
DELIVERED THROUGH DISCIPLINE,
NOT DISCOUNTING

*Disciplined operations
that translate directly into
measurable savings*

BUILT ON PROVEN SAFETY SYSTEMS

At Skyservice, safety is not a department – it's a discipline embedded in how we operate, plan, and make decisions every day. It shapes not only our standards and training, but our expectations of accountability at every level.

Our commitment is validated through recognized, third-party standards, including:

- ARGUS Platinum Rating
- IS-BAO Stage III certification
- Continuous audits and SMS (Safety Management System) compliance
- Data-driven risk analysis and mitigation

These designations reflect validated safety systems, disciplined operational oversight, and a culture where safety, including operational security and data integrity, is sustained, not situational.

**Safety isn't a box we check.
It's the foundation we operate on.**

*ARGUS Platinum and
IS-BAO Stage III certifications
are held across our
Canadian operations*

SAFETY EMBEDDED IN
HOW WE OPERATE — EVERY DAY

MAINTENANCE EXPERTISE THAT PROTECTS YOUR INVESTMENT

Maintenance should do more than satisfy regulatory requirements – it should actively protect the aircraft you own and the capital behind it.

Skyservice approaches maintenance with a long-term view focused on reliability, longevity, and resale value. As an authorized and certified partner for leading original equipment manufacturers (OEMs), our teams deliver the full spectrum of services, including scheduled inspections, aircraft on ground (AOG) recovery, major overhauls, repairs, non-destructive testing (NDT), and aircraft recycling – all performed under disciplined, audited processes.

Because we manage the aircraft holistically, owners benefit from:

- Maintenance planning that protects long-term asset value
- Reduced downtime through integrated, in-house maintenance planning, minimizing unnecessary aircraft movement and schedule disruption
- OEM-authorized work that supports stronger resale positioning
- Access to charter services when your aircraft is temporarily offline

This is maintenance guided by mastery – not just compliance.

Pre-Purchase Inspections & Oversight

Skyservice verifies aircraft condition, airworthiness, and value with disciplined precision – ensuring owners have the technical truth they need before committing to a purchase.

MAINTENANCE GUIDED BY MASTERY –
NOT JUST COMPLIANCE

TOTAL VISIBILITY ACROSS YOUR AIRCRAFT OPERATION

Managing an aircraft should come with certainty, not ambiguity. Skyservice integrates complex financial data and live operational milestones into a seamless digital experience.

Financial Transparency

Clarity is the foundation of a managed partnership. Through a secure financial portal, owners move beyond summaries into real-time, line-item visibility. Every expense is backed by receipt-level documentation and SAP Concur®-integrated workflows, ensuring a level of accountability that satisfies the most rigorous standards. From Canadian GAAP-aligned reporting to multi-currency tracking, your financial data is centralized, secure, and precise.

Operational Awareness

Effective decision-making relies on accurate data. Our operational portal provides a live connection to your aircraft's readiness, from crew assignments and flight schedules to real-time maintenance progress. By bridging the gap between the hangar and the home office, we ensure you are never more than a click away from your aircraft's status. Whether overseeing a long-term inspection or planning an immediate departure, the information is both current and absolute.

*Complete financial
visibility, down to each
individual transaction*

COMPLETE CLARITY —
RIGHT DOWN THE LINE

BECAUSE OWNERSHIP SHOULD INSPIRE CONFIDENCE — NOT COMPLEXITY

Charter Revenue Options

For owners who choose to charter, Skyservice manages revenue opportunities responsibly — aligning utilization with owner preferences while upholding the safety and operational standards required for the aircraft.

Aircraft Sales & Acquisitions

Skyservice's IADA-accredited sales professionals provide disciplined guidance through acquisition or sale, supported by global market insight, technical evaluation, and negotiation expertise — helping owners understand true market value and secure terms that protect their interests.

*Sales, operations, and
maintenance aligned
across the full ownership
lifecycle*

ONE STANDARD. EVERY STAGE
OF OWNERSHIP.

AIRCRAFT MANAGEMENT IS ULTIMATELY ABOUT TRUST

Few aircraft management providers operate with the level of integration and direct operational control that defines the Skyservice platform. This structure provides owners with coordination, visibility, and lifecycle continuity that fragmented or vendor-based models are not designed to deliver.

Because each element of our operating environment is aligned, decisions affecting safety, maintenance, cost control, utilization, and long-term asset value can be managed with a broader ownership perspective. This integrated model supports more consistent performance and informed decision-making throughout the life of the aircraft.

For owners seeking a stable, experienced, and fully integrated operating partner, Skyservice offers a level of capability distinct within the business aviation market.

We value the opportunity to support your aircraft through a disciplined, long-term partnership built on experience, accountability, and an integrated approach to business aviation.

*An integrated approach to
aircraft management—delivering
visibility, control, and consistent
performance.*
